WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risks

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as 2 out of 7, which is a low risk class.

This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the Sub-Fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

Beside the risks included in the risk indicator, other risks may affect the fund performance. Please refer to the fund prospectus, available free of charge at <https://funds.waystone.com/public>.

WHAT HAPPENS IF WAYSTONE MANAGEMENT COMPANY (LUX) S.A. IS UNABLE TO PAY OUT?

The Management Company of the Fund has no obligation to pay out since the Fund design does not contemplate any such payment being made. You are not covered by any national compensation scheme. To protect you, the assets are held with a separate company, a depository. Should the Fund default, the depository would liquidate the investments and distribute the proceeds to the investors. In the worst case, however, you could lose your entire investment.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 3 years

This product is designed for longer term investments; you should be prepared to stay invested for at least 3 years. However, primary market redemptions at net asset value can be made on any day, subject to a minimum sizing, by Authorised Participants. The ETF Shares will be listed on one or more stock exchanges and one or more members of such stock exchange(s) will act as market makers who are expected to provide daily liquidity, quoting offer and bid prices at which the ETF Shares can be purchased or sold in the secondary market, respectively, by investors who are not Authorised Participants or do not deal directly with an Authorised Participant. The Sub-Fund will not charge any subscription or redemption fees but in exceptional circumstances a dilution levy up to 2% could be charged to mitigate the impact of any exceptional costs. In the secondary market, other trading costs may be incurred over which the Company has no control. Investors may pay more than the current Net Asset Value per ETF Share when buying ETF Shares on the secondary market and receive less than the Net Asset Value per ETF Share when selling ETF Shares on the secondary market.
